

| **allocacoc** |
a different standard.

allocacoc

Introduction

“ Doing different is the only way to make a difference ”

Who we are

Allocacoc is a one-of-a-kind industrial design company that is not limited to any category or current industry.

Vision

To be a company that inspires you with products of **a different standard.**

Mission

Our mission is to improve the design and value of existing products that provide **a new user experience**, and make them **accessible** to every household in the **world.**

How we work

Design

With only a nice shape we will not be able to create a change. This is why functionality is important. Our products should offer a solution to a problem that current products on the market do not address.

Production

We pay close attention to the cost: It needs to be affordable for the end user to buy the product. Only when these two criteria are met will it be worthwhile for the end user to adapt to the different standard.

Sales

Our products should also be widely available: from the largest hypermarket to the smallest neighbourhood convenience store. This means that we need a well defined distribution model, with a clear role and value for every link in the distribution chain.

Awards

Our vision helps us to create innovative solutions with value to current daily problems and to achieve recognition on multiple platforms.

Red Dot Design award

Shell Livewire award

Moscow Gift award

CEDIA Winner award

GIO award

MKB Innovation award

Innovation award

CITE award

Energy award

Sales & Market Share

International focus

Allocacoc was founded in 2011. It has always focused on setting a different standard. Such a standard is not limited to a country's borders, which is why we had a strong international focus since the beginning. Currently, we have five offices over three continents and a product presence in more than 80 countries.

Worldwide Partners

Due to our international focus, we are proud to have established many worldwide partnerships. We value our partnerships with good collaboration and communication, as we always aim for long-term business relationships.

PowerCube | Originals |

“Plugs never block”

Socket multiplier

With the PowerCube |Original| plugged into just one socket, you immediately gain up to 5 additional sockets. From toasters, microwaves and kettles, to TV's, speakers and lamps, you will never run out of power outlets to use.

Building blocks

PowerCubes have a modular system that allow the cubes to be stacked together, expanding the number of sockets that adapt to your needs.

No blockage

Our uniquely designed PowerCube prevents bulky adaptors and plugs from blocking each other. This means that all additional sockets on the PowerCube can be used at the same time!

Duo-charging

You can charge two USB-charging devices, such as smartphones and tablets, at the same time. The dual high-power USB ports (2.1A) allow a faster charging time than charging via your laptop.

A single button

Our products are meant to make your life more efficient and less complicated and should take no more than a glance to figure out how to use. The PowerCube |Original Switch| lives up to this standard with its single On/Off button to power your devices on and off.

No messy cords

Keep your environment organized with one compact power solution.

PowerCube | Extendeds |

“ Always within ”
reach

Docking system

PowerCube | Extendeds | come with a unique docking system that allows you to mount the PowerCube on any flat surface so it will always be within reach.

Removable tape

The unique docking system uses strong adhesive tape that leaves no traces on the surface when removed. You can always replace the tape with new ones to mount the PowerCube on a different surface.

No blockage

Our uniquely designed PowerCube prevents bulky adapters and plugs from blocking each other. This means that all additional sockets on the PowerCube can be used at the same time!

Duo-charging

You can charge two USB-charging devices, such as smartphones and tablets, at the same time. The dual high-power USB ports (2.1A) allow a faster charging time than charging via your laptop.

A single button

Our products are meant to make your life more efficient and less complicated and should take no more than a glance to figure out how to use. The PowerCube | Original Switch | lives up to this standard with its single On/Off button to power your devices on and off.

Cable management

You can organize your power cords by aligning the cable with the provided cable fix.

PowerCube | ReWirables |

“ For home and ”
travel use

Travel plugs

All you need is one PowerCube | ReWirable | to travel around the world. The set of additional plugs are interchangeable and cover frequently traveled destinations: Europe, United States, China, Australia and United Kingdom.

No blockage

Our uniquely designed PowerCube prevents bulky adaptors and plugs from blocking each other. This means that all additional sockets on the PowerCube can be used at the same time!

Universal socket - plug connection

The worldwide standard receptacle (fused for max 6-10A) allows you to use your old IEC cables as an extension cord for the PowerCube | ReWirable |

Functional at home or abroad

Once you return home, simply switch the plug to one that is compatible with your home country and continue to use the PowerCube | ReWirable | at home.

Duo-charging

You can charge two USB-charging devices, such as smartphones and tablets, at the same time. The dual high-power USB ports (2.1A) allow a faster charging time than charging via your laptop.

PowerCube | Remotes |

“ ON/OFF in one go ”

A single button

Simply pressing on the remote button will switch your devices on and off from a distance.

Press by foot

If both hands are occupied, you can just as easily use your foot to press the big step-on button to control your devices.

Battery-free

A battery-free PowerRemote is not only good for the environment, but it also gives you one less thing to buy at the store.

One-to-many and Many-to-one

The PowerCube | Remote | can be paired with multiple PowerRemotes, and vice versa. All you have to do is press and hold the button for 5 seconds!

Sticky-pad on the PowerRemote

Attach the PowerRemote to any flat surface to place it wherever it suits you best. You can always remove it without leaving any residue, and stick it on another surface.

PowerCube | Monitor

“ Real-time ”
monetary costs

- ¥
- \$
- €
- £

Real-time cost

The PowerCube | Monitor | shows energy consumption readings in your local currency.

Current consumption

Current consumption is displayed like a car speedometer to make it easy to read at a glance.

On/Off switch

The display doubles as an on/off switch, so you can start saving energy with just one press.

Detailed consumption of stand-by energy

Consumption of up to 1/1000th of a cent is measured and displayed, so you get direct feedback even for low-consuming devices.

By pressing the display twice, you can reset the counter to measure detailed consumption for a period of choice.

Total consumption

The total consumption is also shown and can be reset by pressing and holding the display for 5 seconds.

PowerCube | WiFi |

“ Instant WiFi ” hotspot

WiFi range extender

The PowerCube | WiFi | amplifies wifi signals further so that it can reach areas in your house or office that it couldn't reach before.

WiFi connections

The number of devices that are connected to your WiFi is shown in the display.

Download speed indicator

You can see at a glance how fast your connection is, from 10kb/s to 2mb/s.

Lan connection

You can also opt to use a LAN data cable for an uninterrupted connection from your router.

Switch On/Off

Pressing the button allows you to switch the WiFi on and off.

audioCube
designed by alloccacoc

audioCubes

“ A surround sound ”
experience

A surround sound experience

The audioCube's omnidirectional speakers create a unique 360° audio experience whereby the sound interacts with its environment.

Bass

Its incredible bass is amplified by a vibrating plane that also functions as an on/off switch.

No external adapter required

The integrated power circuit in the audioCube means that no bulky external power adapters are needed, making it easy to place and charge anywhere.

Internal battery

The audioCube | Portable | has an internal battery life that lasts up to 12 hours, longer than any other similar-sized portable wireless speaker.

Bluetooth

Controls

You can connect your device to the audioCube through Bluetooth or an audio jack. The buttons (pause/play, volume, previous/next track, and pairing) are controlled by a single press.

audioCube | Modular |

“ Create your infinite ” surround sound system

Bluetooth

Easy and infinite pairing

Simple pairing with one press of a button. Set one of the audioCubes as "Host" by connecting it to your phone or computer through Bluetooth pairing, and have an infinite number of audioCubes sync to the "Host". No app or internet connection needed.

Replica Master Replica

360° sound experience

Each audioCube provides a true 360° sound experience with 4 high-fidelity speakers and 1 woofer to create that incredible bass.

Master Replica

Surround sound

Simply connect your device via Bluetooth to the "Host" up to 10m away. All other "Guest" audioCubes can be linked from up to 30m away. Put them in different places to create the ultimate surround sound.

Multi-layered sound experience

For a personalized audio experience, the "Host" audioCube can be paired with other allocacoc audio modules such as the bass, tweeter, or loudspeaker modules to create a multi-layered sound effect, according to your preference.

Portable

The internal battery lasts for at least 12 hours and is rechargeable with an IEC cable. No external adapter is required.

PowerUSB's

“ Charge and ” expand

4 additional USB ports

The ports function for data transfer as well as charging, offering a solution to the lack of USB ports on contemporary devices.

Fast charging

It can be plugged directly into a power socket, enabling the PowerUSB | Portable | and your connected devices to be charged simultaneously and at a faster speed.

Internal battery indicator

A built-in 5,000mAh battery is featured in the PowerUSB | Portable | so you can continue charging devices on the go. There is also a clear battery indicator to make it easy to know how much battery life is remaining.

Travel and extend

You can use the PowerUSB anywhere you are by switching the plug with one of our travel plugs. The worldwide standard receptacle (fused for max 6-10A) also allows you to use your old IEC cables as an extension cord for the PowerUSB.

Compatibility

It is compatible with all our other products for you to create a tailored power solution.

No loose cables

A cable fix is also integrated into the corners of the PowerUSB, so that your cable can be fixed neatly onto the product and no longer entangle.

LightCube

“ The light bulb ” re-invented

Flexibility

Unlike traditional light bulbs, LightCube can be plugged into any power socket without the need for a lighting fixture. It can be placed anywhere to lighten up a room.

Gesture control

LightCube can be controlled with hand gestures. Simply wave your hand in front of the sensor to turn it on/off. Hold your hand in front of the sensor to adjust the brightness. Once you have arrived at your desired brightness level, move your hand away from the sensor.

stay for 2 seconds

Dimmable with memory

It will remember and maintain the set level of brightness until the next time you adjust it.

Manual control

Deactivate the sensor by pressing on the black button on the LightCube. This switches it from gesture to manual mode, and vice versa.

Compatible

Combined with our accessories (e.g. LightStand, LightFix, LightShade), it can be used as a floor lamp, ceiling lamp, table lamp, wall lamp, spotlight etc.

Portable

LightCube|Portable| has a rechargeable internal battery that provides several hours of continuous lighting, without being plugged into a socket.

USB Cable

“ One for all ”

One cable for all

With the USBcable |3in1|, all you need is one cable to charge your devices that have different connectors (USB-C/Micro-USB/Apple Lightning)

CableFix included

Stick the CableFix on any smooth surface like a desk or a wall to position the cable neatly. To reposition the cable, remove the CableFix, wipe the stickypads with a damp cloth, and re-stick it elsewhere.

Minimalist design

The minimalist design gives an elegant and modern feel.

No entanglement

The flat design of the Power|USBcable| makes it much less likely that the cord will entangle.

Data transfer

Besides charging devices, it also allows data transfer. For example, you can connect your device to a computer to transfer files, or synchronize music between your phone and laptop.

CableFix

“ Cable management ”

Simple design

The CableFix has a simple and modern design that makes it visually appealing and easy to use.

Versatile

It can be easily fixed to any surface, such as a desk or a wall, enabling you to route your cables exactly the way you want them.

Adapts to your needs

It is compatible with a range of cable sizes, from Ø4 - 10 mm.

Ease of use

It can be mounted onto any flat surface with its re-usable adhesive pad. You can remove the CableFix without leaving any trace, and wipe it with a damp cloth to regain its stickiness.

Mounting hole

It can also be mounted onto uneven or round surfaces with screws or nails.

NoteBook | Modular |

“ Never walk around with unwanted notes. Never be out of pages. ”

Magnetic

The embedded magnets on the cover provide easy access and protection of your valuable content inside the NoteBook.

Flexibility

Exchange, re-arrange and distribute your notes by adding and removing pages when needed.

The standard sizing of the NoteBook

You do not need to go to the store to buy special paper. Standard paper can be found everywhere to create the NoteBook of your choice.

Customizable templates

A free set of various templates (A4/US Letter) are included in the NoteBook. If you need more, you can simply download the templates you need on our website. Print them out, and add them to your NoteBook!

User-friendliness

Suitable for both left-handed and right-handed users. Makes notes anywhere, standing, laying down or while travelling.

earBeans

“ World’s lightest earphones for best comfort ”

Superior comfort

EarBean's crafted contour with silicone material offers a pleasing user experience, giving the best comfort.

earBeans

others

Small and light-weight

EarBeans are the smallest and lightest earphones in the market. They fit so easily that they become part of you when you're wearing them.

Crisp and clear sound

EarBeans have built-in micro-speakers commonly used in the hearing aid industry, delivering astonishing acoustic sound.

One size fits all

Its ergonomically bean-shaped contour provides a secure fit for your ears.

No left or right

There are no left or right sides to the earBeans. Just place them on and be on your way!

Sound optimization through in-ear wearing styles

By putting the earBeans in your ears in different ways, you create multiple sound environments.

allocacoc | FoldBag |

“ Four bags in one ”

Four-in-one

The integrated strap is specially designed for you to easily switch between all four types of bags according to your preference.

Uses : Tote, Shopper, Purse, Backpack

Three storage compartments

Stay well organized by storing your items in the different compartments.

Two ways to prevent theft

Not only can the zipper be hidden, but you can also flip the bag upside down so that the opening is at the bottom, making it even more difficult for pickpockets to reach.

One fold

Simply fold into a purse or shoulder bag, and the magnets will keep it in place.

Technical Specifications

Size	43cm x 30cm x 9cm (big enough for 15inch laptop)
Colors	Brown, Dark Grey, Blue, Green, Beige, Black
Material	PU

CarCharger | SmartUSB-C | & CarCharger | USB-C |

“ USB type-C PD Fast charging ”

LED indicator

A cool blue LED indicator lights up when the car charger is plugged in, making it more convenient to use at night.

Smart and safe charge

Using a self-protection internal chip, it is automatically protected from over-heating, electromagnetic interference, overcurrent, over-voltage, and short-circuit.

Charge two devices from CarCharger | SmartUSB-C |

With dual USB ports (Type-A & Type-C) you can always charge two devices at the same time.

Simple and elegant design

Simple and sleek with a smooth aluminum or copper finish, it is an elegant addition to your car.

High power and fast charge

With a faster charging speed, supporting USB Power Delivery, you can charge your phones, tablets or laptop in the car more quickly!

FlashLight

“

More than just
a flashlight

”

Multi-functional

Not only does it work as a traditional flashlight, but it also transforms into various household lighting appliances by combining it with different lighting stands. Use it for functional use, such as a table lamp or a bicycle light, or create an ambience with a nightlight or a candle simulator.

High/Low brightness level

Simply press and hold the button for 2 seconds to switch the brightness level according to your preference.

Rechargeable

The integrated battery lasts up to 8 hours in default mode and is rechargeable within 3 hours using a USB-C cable.

Battery level indicator

The LED indicator blinks when the battery is low. The light stops blinking and stays on when fully charged, turning off only when the USB-C cable is unplugged from the device.

eScooter | Foldable |

“ The most compact foldable eScooter ”

Foldable, light and compact

At just 11kg, its lightness together with its compact size makes it a breeze to fold and pull along. Perfect for situations where bikes are not allowed, such as on the train, bus or walking down the shopping street. When you need to bike again, simply unfold it and voilà!

Let it stand anywhere

A uniquely designed kickstand with wheels lets the folded bike not only stand by itself but also be pulled along. When unfolded, simply use the integrated side kickstand.

● Increase speed
● Power on/off button
● Decrease speed

Control your speed

The display shows the real-time speed in km per hour. Choose between 3 levels of speed, level 1 being the lowest speed. You can ride up to the preset maximum speed of the selected level.

Lightweight and simple design

Every part of the bike is designed with simplicity in mind. Its rear wheel brakes are hidden, kickstands are cleverly integrated into the bike design.

CityBike | Basic |

“ Simply a bike ”

Simple design and sturdy frame

The CityBike | Basic | has a simple and sturdy solid geometric design, with a distinctive frame consisting of one main bar. This simple shape ensures easy maintenance and a carefree bicycle, while the diagonal bar improves the sturdiness of the frame.

Integrated brakes

Powerful drum brakes are integrated at the rear and front of the bike.

Theft-proof

Every loose part poses a risk for theft, which is why we integrated the bell into the bike to prevent theft.

Adjustable seat

With the simple handle, you can easily adjust the seat to your height, ensuring that you have the optimal pedaling position.

DesignNest
the crowdfunding platform

DesignNest

DesignNest is one-of-a-kind crowdfunding platform and provides much more benefits than any other platform, design studio, OEM and distribution networks altogether. DesignNest provides design knowledge, brings sourcing, production and assembly together with distribution and sales.

for Designers

“ Create... Fund... Manufacture... Sell... ”

Create

When you have created a product you can upload it to our crowdfunding platform www.designnest.world. Other users on our platform can suggest alterations on how to improve the product. But we will also share our knowledge and expertise in mass production, product marketing and offer assistance on legal aspects. All of this support is optional and does not affect your intellectual property ownership.

Fund

Your product is published on our platform where anyone can preorder. Unlike other crowdfunding platforms, we will not take any commission on the amount raised.

Manufacture

We ensure the best price-quality ratio through our large base of trustworthy sources in the overwhelming world of suppliers. We also offer the option to use our in-house production and assembly facilities, allowing total quality control, agile decision-making and quick product adjustments - but it is not obligatory to use our facilities. You can always opt to use your own suppliers.

Sell

Your product will be launched to different retailers worldwide through our existing and well-established distribution and sales network. Our dedicated sales team will actively promote your product, and you will earn from each and every product that is sold.

for Backers

“ Taking needs and wishes ”
to the next level

100% Product or credit

Unlike other crowdfunding platforms, we offer 100% product or credit guarantee for your investment. We are the only company providing this level of protection, and ask for initial payment to negate the risks of a project failing to be completed.

Crowd design

There is always room for improvement. As a backer, you can comment on every published project on the DesignNest platform. We invite everyone to bring forward their ideas on how to improve the project.

FAQ

How many PowerCubes can be combined?

In theory, PowerCubes can be extended infinitely, as long as the devices connected to them do not draw more than the specified rating on the PowerCube. However, we recommend to attach no more than three PowerCubes together.

Is the PowerCube safe to use with a power hungry device, like e.g. a microwave?

The PowerCube is as safe as any other power outlet, and built to last. Also, the PowerCube is fully grounded, and all sockets are child-proof.

What differentiates the PowerCube from other power strips?

Versatility: it can be mounted anywhere with its unique docking system. The design of the product also ensures that plugs cannot block one another, so devices can be charged simultaneously. Furthermore, its modular system enables it to be stackable and expandable, allowing you to create a power solution tailored to your needs.

We created a completely new user experience of an existing product, making it user-friendly and more versatile.

How long does it take to charge a device via the USB-output?

The USB ports provide 2.1A of power combined, quadruple the USB standard of 0.5A. As a result the charging time will be shorter than charging via a USB port on your computer. There is a built-in chip that detects how many devices are connected and adjusts the output according to this. So if only one device is connected, it will be able to use the full 2.1A output. If two are connected, they share this total output.

Can I charge my iPad via the USB-output?

The minimum required power to charge an iPad is 1A. Since all of our USB-ports have a 2.1A output, it is powerful enough to charge your iPad.

How come the PowerRemote does not use any batteries?

By pressing the button, enough kinetic energy is created to send a pulse to the PowerCube Remote.

How many Remotes can be paired?

Our unique dedicated protocol allows you to pair unlimited remotes to a single cube and visa versa.

Will the battery of the audioCube | Portable | or PowerUSB | Portable | be damaged if I leave it charged for a long time?

All our products that use battery have an automatic 'safe charge stop' implemented inside. This ensures that even when the battery is full, the products can continue to be charged without damaging the battery.

Why is the audioCube charged with an IEC cable?

The audioCube is a high-powered speaker with a louder volume and higher decibel than normal bluetooth speakers. For this reason, it has an integrated power adapter connected with an IEC outlet to provide the extra power directly from the socket.

FAQ

How many times can the PowerUSB | Portable | fully charge my phone/device?

This depends on the battery capacity of your device. If the battery capacity of your device is for example 1000mAh, the PowerUSB | Portable | can fully charge it 5 times.

Are your products available for my country?

There are many different socket types around the world, 15 to be precise. We adapt our products to all socket types and local standards so they can be used in every country.

Are your products certified?

All of our products comply to the required local standards and regulations.

How do you protect your products against look-alikes?

At Allocacoc, we are designers at heart. We create solutions to problems, which results in original products. As our products gain popularity, 'remarkably similar' products are starting to appear on the market. We don't feel threatened though. Rather, we feel honoured that they also see the greatness of the product. Being copied is the greatest recognition a product can get. This also confirms that we really do set a different standard.

That being said, we also take action to protect our products by focusing on the following aspects:

- Protection of our intellectual property rights on internal construction, design and utility
- Continuously innovating, never stopping the flow of ideas for new products
- An extensive focus on build quality and product safety
- Taking into consideration the complete user experience and safety of our products, from packaging, installation to extensive usage.
- A good pricing strategy. Even before we start to design a product, we already have a target price in mind. This enables us to make crucial decisions throughout the entire process, and ensures that all of our products will be affordable to the end-consumer. We also do not charge any 'design fees' or other hidden costs that some copycats do, which makes their copy more expensive than our original.

By focusing on these key aspects, we are confident that we can maintain the lead in the industry and continue to set a different standard.

Where can I find more information on the products of Allocacoc?

On our website www.allocacoc.com, you will find the latest company news, products, and additional information. We also post regular updates on Facebook and Twitter, and we welcome you to follow us there too!

We hope you are as enthusiastic about our products as we are! Stay with us for more products to come!

For more information, visit us at www.allocacoc.com. or please e-mail us at info@allocacoc.com.

Look-alike

Caution

Dangerous look-alikes

Since we launched the PowerCubes in 2011, we have seen many others producing similar products of similar design. We don't feel threatened though. Rather, we feel flattered that they also see the greatness of the product. However, the quality of their design, usability, material and safety is often not at all near to our products. As designers and makers of the authentic Allocacoc PowerCube, we know how important quality is for electrical products. We acknowledge the danger that comes with products that are of low or inconsistent quality, and we care greatly for the users' safety. We would therefore like to give users a clear understanding of each product's design, usability, material and safety. Our website will provide an overview comparing our products to look-alike products in the market. With that overview, we aim to make a difference for all users.
